

## Part Three/Chapter Twelve

### LIGHTING

#### DISCUSSION QUESTIONS:

1. Explain the difference between single phase and three phase power.
2. Recite the West Virginia formula? Describe why it is so important.
3. Categorize the different types of lighting fixtures based on the qualities of light they produce.
4. Restate the options for dimming that have been available over the years. List why each advancement was better than the last.
5. Argue for and against computer lighting controllers versus manual controllers.
6. Choose your favorite accessory and create a situation where it would be appropriate to use.
